

# Self-operated Regulators

For cryogenic media

## Spare Parts and Accessories

Connecting components · Non-return units · Service kits · Conversion kits · Others

### Application

Spare parts and accessories for Series 2357 Pressure Regulators and Type 2040 Safety Temperature Monitor · All parts cleaned and packed in bags to protect them from contamination (free of oil and grease) for oxygen service (provided not labeled otherwise).

SAMSON offers the following spare parts (parts subject to wear) and accessories for the safe and reliable functioning of regulators:

- **Connecting components**

Soldering nipples with ball-type bushings including coupling nuts for installation in pipelines. The nipples are soldered at the site of installation.

Welding ends including coupling nuts for installation in pipelines. The welding ends are welded at the site of installation.

- **Non-return units**

Prevents the medium from flowing back into the valve.

- **Service kits**

Parts subject to wear, e.g. plugs, diaphragms and seals

- **Conversion kits**

Springs, diaphragms or operating bellows to change the set point range of regulators

- **Others**

Filters, accessories to raise the downstream pressure, caps etc.
