

Series 250

Type 3251-1 and Type 3251-7 Pneumatic Control Valves

Type 3251 Globe Valve

DIN version

Application

Control valve for process engineering applications with high industrial requirements

Nominal size DN 15 to 500

Nominal pressure PN 16 to 400

Temperatures -196 to +550 °C

Type 3251 Globe Valve operated with

- Type 3271 Pneumatic Actuator (Type 3251-1 Control Valve)
- Type 3277 Pneumatic Actuator (Type 3251-7 Control Valve) for integral positioner attachment

Valve body made of

- Cast steel
- Cast stainless steel, high-temperature cast steel or cast cold-resisting steel
- Special materials

Low-noise valve plug

- Metal seal
- Soft seal up to PN 40
- High-performance metal seal
- Balanced to handle high differential pressures

The control valves, designed according to the modular assembly principle, can be equipped with various accessories:

Positioners, limit switches, solenoid valves and other accessories according to IEC 60534-6 and NAMUR recommendation (see Information Sheet ▶ T 8350 for more details).

Versions

Standard version with PTFE packing for temperatures from -10 to +220 °C or with adjustable high-temperature packing for -10 to +350 °C, nominal size DN 15 to 500, nominal pressure PN 16 to 400 (see Table 1)

- **Type 3251-1** (Fig. 1) · Type 3251 Valve and Type 3271 Actuator with 350 to 2800 cm² actuator area (see ▶ T 8310-1, ▶ T 8310-2, and ▶ T 8310-3)
- **Type 3251-7** · Type 3251 Valve and Type 3277 Actuator with 350 to 750v2 cm² actuator area, for integral positioner attachment (▶ T 8310-1)

Further versions

- **Welding ends or welding-neck ends** · According to DIN EN 12627
- **Flow divider** or **AC-1/AC-2/AC-3** Trim for noise reduction (see ▶ T 8081, ▶ T 8082, and ▶ T 8083)
- **Valve plug with pressure balancing** · See Table 3
- **Perforated plug** · See Data Sheet ▶ T 8086

Fig. 1: Type 3251-1 Pneumatic Control Valve with Type 3271 Actuator

- **Insulating section or bellows seal** · See Technical data
- **Heating jacket** · Details on request
- **Additional handwheel** · See Data Sheet ▶ T 8310-1
- **ANSI version** · NPS ½ to 20, Class 150 to 2500, see Data Sheet ▶ T 8052
- **Type 3251 Valve with Type 3273 Hand-operated Actuator** · For valves with max. 30 mm rated travel and side-mounted handwheel for travel > 30 mm, see Data Sheet ▶ T 8312
- **Type 3251-2 Electric Control Valve** · Details on request

Principle of operation

The medium flows through the valve in the direction indicated by the arrow. The valve plug determines the cross-sectional area of flow. The version with bellows seal (Fig. 4) is fitted with a test connection to monitor the stainless steel bellows.

The valves can be equipped with a flow divider (► T 8081) for noise reduction.

Pressure balancing must be used when high pressures or differential pressures act on the plug (Fig. 3).

Fail-safe action

Depending on how the springs are arranged in the pneumatic actuator (see Data Sheets ► T 8310-1, T 8310-2, and T 8310-3), the valve has two different fail-safe positions effective upon air supply failure.

Actuator stem extends (fail-close)

The valve is closed upon air supply failure.

Actuator stem retracts (fail-open)

The valve is opened upon air supply failure.

Differential pressures

The permissible differential pressures can be found in the Information Sheet ► T 8000-4.

Figs. 2 to 4 show configuration examples.

Selection and sizing of the control valve

- Calculate K_v coefficient according to IEC 60534.
- Select nominal size DN and K_{vs} coefficient from Table 3.
- Select the actuator and determine the permissible differential pressure from the Information Sheet ► T 8000-4.
- Select the valve body material from Table 1 and Table 2 as well as from the pressure-temperature diagrams (see Information Sheet ► T 8000-2).
- Select accessories from Table 1 and Table 2.

Order specifications

Nominal size	DN
Nominal pressure	PN
Body material	According to Table 2
Bonnet	Standard bonnet, insulating section or bellows seal
Type of end connections	Flanges/welding ends
Plug	Standard or balanced Soft seal, metal seal or high-performance metal seal
Characteristic	Equal percentage, linear or quick opening
Actuator	Type 3271 or Type 3277 see Data Sheets ► T 8310-1, T 8310-2, and T 8310-3)
Fail-safe position	Fail-close or fail-open
Process medium	Density in kg/m^3 and temperature in $^{\circ}\text{C}$
Flow rate	kg/h or m^3/h
Pressure	p_1 and p_2 in bar (absolute pressure p_{abs}), with minimum, normal and maximum flow rate
Valve accessories	Positioner and/or limit switch
