

Series V2001 Valves

Type 3321 Globe Valves

with electropneumatic, pneumatic or electric actuators

SAMSON

DIN version

Application

Control valves designed for mechanical and plant engineering.
Suitable for liquids, gases and steam

Valve size	DN 15 to 100
Nominal pressure	PN 16 to 40
Temperature range	-10 to +300 °C

Type 3321 Globe Valves can be equipped with either electro-pneumatic, pneumatic or electric actuators:

- Electropneumatic actuators with integrated or mounted i/p positioner (Type 3321-IP Control Valve)
- Pneumatic actuators (Type 3321-PP Control Valve)
- Electric actuators (Type 3321-E1 or Type 3321-E3 Control Valve)

Valve body materials

- Cast iron for PN 16
- Spheroidal graphite iron for PN 25
- Cast steel for PN 40 (up to DN 50) and PN 16 and 40 (DN 65 and larger)
- Stainless steel for PN 40 (up to DN 50) and PN 16 (DN 65 and larger)

Nominal sizes DN 15 to 100 each with two K_{VS} coefficients

Metal or soft-seated valve plug

The control valves can be optionally equipped with positioners, limit switches or contacts and resistance transmitters.

Versions

- **Type 3321-IP Electropneumatic Globe Valve** · With Type 3372 Electropneumatic Actuator, optionally with integrated positioner (120 cm² only, with plug connector, see Fig. 1) or Type 3725 Positioner (Fig. 3, Fig. 4), tight-closing function for completely venting or filling the actuator with air, reference variable 4 to 20 mA, max. 6 bar supply air, fail-safe position fail-close or fail-open, optionally with limit switch
- **Type 3321-PP Pneumatic Globe Valve** (Fig. 2) · With Type 3371 Pneumatic Actuator with 120 cm² (DN 15 to 50) or Type 3371 with 350 cm² (DN 65 to 100), fail-safe position fail-close or fail-open, optionally with limit switch
- **Type 3321-E1 Electric Globe Valve** (Fig. 5) · Nominal size DN 15 to 50, with Type 5824-30 Electric Actuator for 230 V/50 Hz or 24 V/50 Hz, optionally with limit contacts, resistance transmitters, positioner
- **Type 3321-E3 Electric Globe Valve** (Fig. 6) · With Type 3374 Electric Actuator for 230 V/50 Hz, 230 V/60 Hz, 24 V/50 Hz or 24 V/60 Hz, optionally with fail-safe action (tested according to DIN EN 14597 with actuator stem extends), limit contacts, resistance transmitters, positioner

Fig. 2: Type 3321-PP

Fig. 3: Type 3321-IP, up to DN 50, with Type 3725 Positioner

Fig. 4: Type 3321-IP, DN 65 and larger, with Type 3725 Positioner

Fig. 5: Type 3321-E1

Fig. 6: Type 3321-E3

Further versions

- **Explosion-protected** version with electric actuators · On request
- **Type 3321 according to ANSI standards** · See Data Sheet T 8112
- **Insulating section** on request
- **Flow divider ST 1** for noise reduction on request

Principle of operation

The process medium flows through the valve in the direction indicated by the arrow in the flow-to-open direction (Fig. 7, Fig. 8). The valve plug position determines the cross-sectional area between the seat and plug. The plug stem is connected to the actuator stem by the stem connector and sealed with a self-adjusting packing.

Fail-safe position

The control valve has two different fail-safe positions that become effective when the supply air fails:

- **Actuator stem extends (fail-close):** The valve closes when the supply air fails.
- **Actuator stem retracts (fail-open):** The valve opens when the supply air fails.

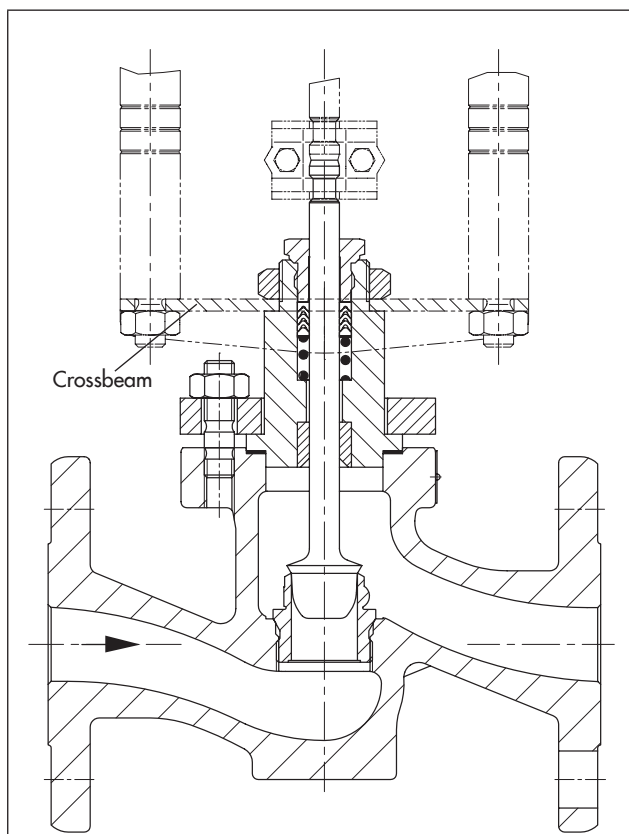

Fig. 7: Type 3321 Globe Valve in nominal size DN 15 to 50

Fig. 8: Type 3321 Globe Valve in nominal size DN 65 to 100

Fig. 9: Type 3321-IP Globe Valve in nominal size DN 15 to 50, actuator with integrated electropneumatic positioner

Associated documentation

Valve and actuator are delivered separately. Instructions on how to mount the valve on the actuator can be found in the mounting and operating instructions delivered with the product:

Ordering text

The following specifications are required on ordering:

Type 3321 Globe Valve

Valve size	DN ...
Flow coefficient	K_{VS} ...
Nominal pressure	PN ...
Body material	Cast iron, spheroidal graphite iron, cast steel or stainless steel
Seat-plug seal	– Metal seal – Soft seal
Options	– Flow divider 1 – Insulating section

Actuators

for **Type 3321-IP**: Type 3372 Electropneumatic Actuator

120 cm² actuator area with integrated positioner, 4 to 20 mA

350 cm² actuator area with Type 3725 or Type 3730-x Positioner, 4 to 20 mA

Optional Intrinsically safe Ex ia

Additional equipment 1 or 2 limit switches

for **Type 3321-PP**: Type 3371 Pneumatic Actuator

Fail-safe position Fail-close or fail-open

Bench range 1.4 to 2.3 bar

Additional equipment 1 or 2 limit switches

For **Type 3321-E1**: Type 5824-30 Electric Actuator

Power supply – 230 V/50 Hz
 – 24 V/50 Hz

Additional equipment – Two limit contacts
 – Resistance transmitter 0 to 1000 Ω
 – Digital positioner:
 – Input: 0/4 to 20 mA or 0/2 to 10 V
 – Output: 0/2 to 10 V

For **Type 3321-E3**: Type 3374 Electric Actuator

Fail-safe action	Actuator stem extends or retracts
Thrust	
With fail-safe action	2 kN (actuator stem extends) 500 N (actuator stem retracts)
Without fail-safe action	1.25 kN; 2.5 kN
Power supply	– 230 V/50 Hz – 230 V/60 Hz – 24 V/50 Hz – 24 V/60 Hz
Additional equipment	– Two limit contacts – Resistance transmitter 0 to 1000 Ω – Digital positioner with input and output 0/4 to 20 mA or 0/2 to 10 V
