

## Application

Limit switch for mounting on

- Type 3353 Angle Seat Valve
- Type 3354 Globe Valve
- Type 3379 Pneumatic Actuator

The limit switch supplies a signal when the valve travel exceeds or falls below an adjusted limit value. This signal is suitable for transferring control signals, for example, to activate visible or audible alarms as well as for connection to centralized control or alarm systems.

## Versions

- **Type 4740** · Electric limit switch, degree of protection IP 65
  - With inductive proximity switches or
  - With microswitches

**Optionally**, both versions can be fitted with a 3/2-way solenoid valve.

**Fig. 1:** Type 4740 Limit Switch with mounting kit (1400-9922) for mounting on Type 3353 Angle Seat Valve and Type 3354 Globe Valve

**Fig. 2:** Type 4740 Limit Switch with optional solenoid valve on a Type 3353 Angle Seat Valve

## Principle of operation

The inductive proximity switches or microswitches cause signals to be sent to a control or alarm system when the travel exceeds or falls below the adjusted limit.

The limit switch can optionally be fitted with a 3/2-way solenoid valve. When the integrated solenoid valve is energized, supply air is applied to the actuator. When the solenoid valve is de-energized, the actuator is vented and the control valve moves to its fail-safe position.

The switching points of the limit contacts can be changed within the travel range.

## Electrical connection

The electrical connection is made using an M20x1.5 cable gland to terminals as shown in the wiring diagram (Fig. 3).

## Ordering text

Type 4740 Electric Limit Switch

Version with	– Inductive proximity switches
	– Microswitches
Options	– 3/2-way solenoid valve
Pneumatic connection	– Push-in L-connector QS-G 1/8-6
	– ISO 228/1-G 1/8

**Table 1:** Technical data

Electric limit switch	Type 4740
Travel range	0 to 15 mm
Ambient temperature range	-20 to +65 °C
Degree of protection	IP 65
<b>Version with inductive proximity switches</b>	
Nominal voltage	8.2 V DC over isolating switch amplifiers according to EN 60947-5-6
<b>Version with microswitches</b>	
Switching capacity	250 V AC, 16 (6) A
<b>Option: 3/2-way solenoid valve</b>	
Nominal voltage	24 V DC
Capacity	1.5 W
Flow rate	55 l <sub>n</sub> /min (K <sub>v</sub> = 0.035)
Maximum operating pressure	7 bar
Pneumatic connection	Push-in L-connector QS-G 1/8-6 or ISO 228/1-G 1/8
<b>Materials</b>	
Housing	Polyamide
Cover	Polycarbonate
Filter	Polyethylene
Mounting kit	Stainless steel
<b>Weight</b>	
Limit switch (including solenoid valve)	Approx. 550 g
Mounting kit	Approx. 180 g

**Table 2:** Accessories

Mounting kit	Order no.
For mounting the limit switch onto Type 3353 Angle Seat Valve or Type 3354 Globe Valve	1400-9922
For mounting the limit switch onto Type 3379 Pneumatic Actuator	1402-1067

**Version with inductive proximity switches**

**Version with microswitches**

**Fig. 3:** *Electrical connection*

**Dimensions in mm**
