Compact Solution

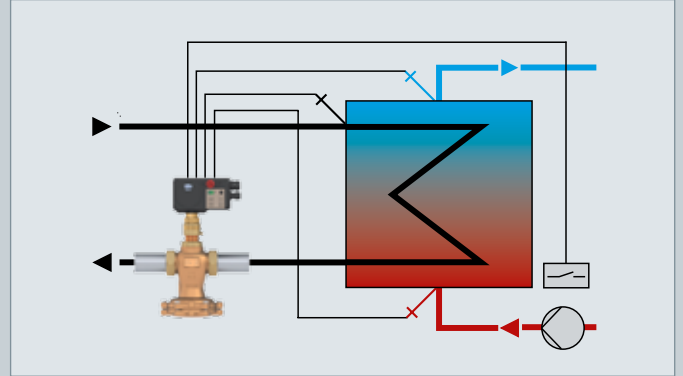

TROVIS 5724-8 Electric Actuator with Process Controller
for heating and cooling applications

- Compact unit with integrated process controller
- Ready-configured plant schemes with system code numbers for heating and cooling applications
- Easy installation and quick start-up
- Control panel with display
- Configuration using the TROVIS-VIEW software and Bluetooth 

Flow temperature control based on the outdoor temperature and return flow temperature limitation

Control of the flow temperature in the secondary circuit taking into account the network supply temperature and the return flow temperature in the secondary circuit

- Compact solution for heating and cooling
- Sensors and control line ready for installation
- Ready-configured system code numbers for quick start-up
- Indication of operating values on the display
- Setting of set point and operating mode at the control panel
- Available up to nominal size DN 100
- Safety function according to DIN EN 14597

Options

- TROVIS-VIEW software for configuration and operation (download free of charge)
- Digital time switch with weekly program and wall mounting kit
- Immersion or contact sensor accessories as ready-wired sensors
- Further sensors, e.g. outdoor sensor or cable sensor
