## Improved Energy Efficiency

Solution for large valve sizes

- Pilot-operated valves in sizes up to DN 400
- For use in heating or cooling circuits together with TROVIS 5724-8 Electric Actuators with Process Controllers
- Differential temperature control with return flow temperature limitation as well as many other applications
- Communication connection using RS-485 two-wire bus with Modbus RTU protocol

Example: heating process

Example: cooling process

Example: district heating

Example: district cooling

### Minimum pressure ranges

DN	Approx $\Delta p_{min.}$ depending on application
125	1.1 to 1.3 bar
150	0.7 to 0.9 bar
200	0.4 to 0.6 bar
300	0.5 to 0.7 bar
400	0.3 to 0.5 bar
